Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to perfluoroalkyl haloalkyl ether compounds, classified in class 568, subclass 583.
 - II. Claims 5-6, drawn to a process for removing contaminants from a substrate, classified in class 8, subclass 142.
 - III. Claims 7-9, drawn to a coating process, classified in class 427, subclass 384.(Note: it is assumed that claims 8 and 9 are actually dependent on claim 7, not 1 as stated.)

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and II/III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product can be used in a materially different process, such as being used as a lubricant.

Art Unit: 1762

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Kent Kokko on August 23, 2004 a provisional election was made WITHOUT traverse to prosecute the invention of Group I, claims 1-4. Affirmation of this election must be made by applicant in replying to this Office action. Claims 5-9 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 2-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 2: the phrase "preferably" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

b) Claim 2: it is not clear what is meant by "about 4 carbons" or "about 1 to 6 carbons". How can a compound have "about" 4 carbons? It appears that the number of carbons needs to be more definitively defined.

c) Claim 3: there is no R_f or w in the formula. Therefore, the definition of the formula does not make sense.

d) Claim 4: it is not clear what the "c-" before the formulas means.

Specification

9. Claims 1-4 are objected to because of the following informalities:

- a) Page 7, middle of page: it is not clear why the definition of n uses a subscript for “-4”.
- b) Example 9 and table on page 23: it is not clear what “c-“ before some of the chemical formulas means.
- c) The priority statement should be updated.

Appropriate correction is required.

Oath/Declaration

10. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: the signatures and dates are illegible.

Allowable Subject Matter

11. Claim 1 is allowed.

Art Unit: 1762

12. Claims 2-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

13. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not disclose nor suggest the compounds as defined in claim 1.

Conclusion

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The examiner can normally be reached on 8:30-6:00, alternate Fridays off.
